

AMIT KUMAR

Full Stack Developer | React | Node.js | AWS | Next | Nest

amiamit576@gmail.com | 9871052407

PROFESSIONAL SUMMARY

Full Stack Developer with **4 years of experience** designing and delivering **scalable web applications** using **micro-frontend and microservice architectures**. Strong expertise in **React, Next.js, Node.js, and NestJS**, with hands-on experience building **modular SPAs**, Backend-for-Frontend (BFF) layers, and **RESTful APIs**. Proficient in implementing **secure authentication and authorization** mechanisms (JWT, OAuth, OIDC), integrating distributed systems, and developing **cloud-native applications**. Experienced across the full software development lifecycle, including **architecture design, testing, CI/CD, and DevOps practices**, ensuring performance, scalability, and maintainability.

TECHNICAL SKILLS

- **Programming:** JavaScript, TypeScript, Python, SQL
- **Frontend:** React.js, React Hooks, Redux, React Router, Micro-Frontend Architecture, SPA, HTML5, CSS3, SCSS, Responsive Web Design
- **Backend:** Node.js, Express.js, Nest.js, REST APIs, GraphQL, Microservices Architecture, Middleware Design
- **Auth & Security:** JWT, OAuth, OIDC
- **DevOps & Cloud:** Docker, GCP, AWS (S3, Redshift, Glue, Lambda),
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis,
- **Testing:** Selenium, Jest, Pytest
- **Tools & Collaboration:** Git, GitHub, JIRA, Postman, Visual Studio Code, GitHub Copilot, Cline (AI Dev Agent)

EXPERIENCE

Application Developer – Telus International

(Aug 2024 – Present)

Willow – Customer Experience Management (CXM) Platform

- Contributed to an enterprise CXM platform unifying multiple business services into a single portal.
- Built a service orchestration layer to streamline workflows and improve system reliability.
- Implemented OIDC authentication (OneLogin) with Authorization Code Flow and JWT validation.
- Designed RBAC security using NestJS guards and decorators to protect backend APIs.
- Integrated SCIM-based user and group provisioning with the identity provider.
- Developed React micro-frontends integrated via a Backend-for-Frontend (BFF) API layer.
- Built and maintained React Micro-frontends using Webpack Module Federation, enabling independent development, versioning, and deployment of UI domains.
- Created reusable UI components documented and tested using Storybook.
- Deployed and supported cloud-native applications on GCP.
- Optimized frontend performance using code splitting, lazy loading, dynamic imports, and bundle federation, improving initial load time and runtime efficiency.

Software Developer – Saffo Solution Technology

(Nov 2023 – Aug 2024)

EMS – Employee Management System

- Developed a web-based EMS platform supporting onboarding, role management, and performance tracking.
- Designed and built REST & GraphQL APIs using Node.js and Express for scalable data exchange.
- Implemented JWT-based authentication and role-based access control for secure HR workflows.
- Managed relational data with PostgreSQL and Prisma, enabling real-time reporting and insights.
- Built modular and reusable React components using React Hooks, improving UI maintainability development efficiency.
- Built modular and reusable React components using React Hooks, improving UI maintainability and development efficiency.
- Collaborated with cross-functional teams to gather requirements, review implementations, and deliver features aligned with business needs.
- Participated in code reviews, debugging, and production support, ensuring application stability and quality releases.

Software Developer – Tech Twister

(Jun 2022 – Nov 2023)

IPO Application Backend Modernization

- Built high-performance, responsive React.js UI for a large-scale IPO application handling peak traffic.
- Integrated frontend with RESTful APIs and FastAPI services to enable real-time IPO updates.
- Optimized state management using React Hooks and Context API, improving maintainability and performance.
- Enhanced performance during peak IPO windows using caching and rendering optimizations (CDNs, Nuster).
- Delivered accessible, cross-browser SPAs with responsive design and ongoing production support
- Collaborated closely with backend and QA teams to ensure end-to-end feature delivery, data accuracy, and system reliability.

EDUCATION

MCA - Sikkim Professional University, Gangtok

Bachelor of Technology (B.Tech) – A.K.T.U, Lucknow

KEY ACHIEVEMENTS

Deployment & Scalability

- Enabled independent deployments by designing modular services and scalable Node.js microservices using Docker.
- Deployed and supported cloud-native applications on GCP, ensuring reliability and scalability.

Security & Identity Management

- Implemented OIDC authentication, JWT validation, and RBAC using NestJS to secure enterprise APIs.
- Integrated SCIM-based user and group provisioning for centralized identity management.

Frontend Architecture & Performance

- Built modern React architecture using micro-frontends, atomic design, reusable components, and custom hooks.
- Improved performance through lazy loading, code splitting, and frontend caching during peak usage

• **Backend & Data Systems**

- Developed REST and GraphQL APIs supporting real-time, data-driven platforms.
- Designed relational data models using PostgreSQL and Prisma for scalable backend systems

Collaboration & Delivery

- Partnered with cross-functional teams to deliver high-impact features aligned with business workflows.
- Improved code quality and maintainability through structured reviews and best practices.

CERTIFICATIONS

Jest Testing – Udemy

SOLID Principles – Udemy
